

AMENDMENT TO THE CLAIMS

Claims 1-5 (Cancelled)

6.(New) A nose mask wherein an arrangement axle is inserted from nares into a nasal vestibule, a plurality of mask portions are selectively fitted on a tip of the arrangement axle, an axle portion is fitted by a cellulose sponge excellent in water-absorbing and buffering and round-shaped filters or round-shaped silicone rubbers capable of filtering the polluted air and excellent in collecting dust, which are arranged on both sides or one side of the cylindrical cellulose sponge to sandwich the cellulose sponge.

7.(New) The nose mask according to claim 6, wherein the configuration of the mask portions, the filters are arranged on both sides of the cellulose sponge on the arrangement axle so that the cellulose sponge and the filters are alternately arranged.

8.(New) The nose mask according to claim 7, wherein the configuration of the mask portions that the filters are alternately arranged on both sides of the cellulose sponge, the cellulose sponge and the filters are arranged on an axle provided a cap having an axle hole in its center, a stopper is inserted into said axle, an axle tip of the cap and the stopper are coupled and formed in the claw-shaped, thereby the cellulose sponge and the filters are fixed on the axle provided on the cap, the tip of the arrangement is formed in the claw-shaped and coupled with a claw provided on the cap so that the mask portion of the arrangement axle is not released by a force in the horizontal direction.

9.(New) The nose mask according to claim 6, wherein the mask portion fitted on the tip of the arrangement axle inserted from the nares into the nasal vestibule, is a nose stopper that the silicone rubbers are arranged on both sides of the cellulose sponge.

10.(New) The nose mask according to claim 6, wherein the nose stopper which silicone rubbers are arranged on both sides or one side of the cellulose is arranged on one end of the arrangement axle, while on the other end of the arrangement axle, the nose mask which the filters are arranged on both sides or one side of the cellulose sponge.

11.(New) The nose mask according to claim 7, wherein the mask portion fitted on the tip of the arrangement axle inserted from the nares into the nasal vestibule, is a nose stopper that the silicone rubbers are arranged on both sides of the cellulose sponge.

12.(New) The nose mask according to claim 8, wherein the mask portion fitted on the tip of the arrangement axle inserted from the nares into the nasal vestibule, is a nose stopper that the silicone rubbers are arranged on both sides of the cellulose sponge.

13.(New) The nose mask according to claim 9, wherein the nose stopper which silicone rubbers are arranged on both sides or one side of the cellulose is arranged on one end of the arrangement axle, while on the other end of the arrangement axle, the nose mask which the filters are arranged on both sides or one side of the cellulose sponge.
